

# STABILIZER KIT 914- MODEL KIT

Input AC Voltage range of 90V to 295V AC.	Intelligent Output Time Delay for protection of load connected.
Regulated output voltage to ensure voltage in range 195 - 245 VAC.	Mains under voltage and over voltage cut off to protect the connected load. (U/V < 175V , O/V > 265V )
Voltage correction within 10 -20 mSec.	Minimum wiring required,
Relay operation near zero crossing of current to ensure reliability and fault free operation.	<b>ONLY 1 CUTOFF SET FOR ALL 5 STEP SETTING</b>

- 1..SINGAL SETTING
- 2- LT BASED OPERATE (NO NEED EXTRA TR) TRANSFORMER
- 3- EASY WIRING & INSTALLATION
- 4- INBUILT HIGH & LOW VOLTAGE CUTOFF WITHOUT ANY KIT & SETTING
- 5--INBUILT TIMER {TDR}
- 6- RELIABLE HIGH QUALITY BRANDED COMPONENT  
HIGH QUALITY BRANDED SOLDER 63/37 GRADE /HIGH QUALITY CNC MAKE BASED PCB
- 7-ACCURATE HIGH QUALITY FULL TESTED

## Transformer Wiring and Diagram details :-
